

THREE DAY WORKSHOP ON THEORETICAL AND APPLIED ECONOMICS & COMMERCE

Organized by

The Department of Economics and Department of Commerce

Katwa College

Duration: May 20-22, 2017

Venue: Katwa College, Katwa, Burdwan, West Bengal, India

The Message

The Department of Economics and The Department of Commerce of Katwa College are going to organize a **Three Day Workshop on Theoretical and Applied Economics & Commerce** that will usher the young researchers as well as the teachers of different colleges and universities in India to generate quality research outputs by extracting knowledge of different techniques covered under the scheme of this short term but valuable academic mission. The said programme will discuss in depth the theoretical backgrounds of general equilibrium, measurements of productivity and efficiency and the modern time series techniques and their empirical/applied investigation to justify their viability. The programme will also address the issues of construction of different developmental indices widely applicable in both the disciplines till date. Eminent academicians with immense command upon the topics will deliver their valuable lectures in long duration under the structure of class room teaching. The organizers have their own missions to convey to the potential participants that 'not just think of any score/points to be secured by attending the workshop passively but concentrate upon the applications of the methodologies to score number of points by developing number of research papers'.

Target Group

The programme has been designed exclusively for the sincere teachers (including the retired persons), corporate personnel (CP) and research scholars/PG students having interests on contemporary researches in the mentioned topics of Economics and Commerce.
