॥ विद्यया विन्दतेऽमृतम् ॥

1. Title of the practice:

'Udbhaboni' - Innovative Handicrafts Exhibition

2. Objectives of the practice:

Bengal has a very rich tradition of handicrafts. Handicrafts of Bengal are today renowned the world over. Full expression of the creativity and artistry of the people of the region find an outlet through the handicrafts made by ordinary village artisans living in many remote areas. These artisans make terracotta items out of clay, beautiful textiles out of cotton threads, *tasar* and other silk products, dokra art with bronze, dolls from animal horns, etc. Thus, the Udbhaboni- creative handicrafts programme organised jointly by Katwa College Cultural Cell and National Service Scheme has the following objectives:

- Encouraging the interested undergraduate students of the college to learn and practice the art of handicrafts making with a view to opening up a channel for self-employment in future
- Encouraging the development of talents among the students
- To arrange special training in certain instances to provide opportunities to the students
- To bring the trained and interested students under the limelight of publicity both from the college and social media to open opportunities for earning

3. The Context

Bengal has a rich and glorious historical tradition of textiles and handicrafts which has been appreciated around the world. As the inheritors of this tradition our students also have a lot of talent in this field apart from their regular studies and they need to be given opportunities for self-employment and earning. We have seen the skill of many of our students of both the Honours and General courses in many of the programmes and exhibitions of the college. The college authorities have then tried to encourage them by providing interested and talented students with training opportunities as also financial support. There are students who have the potential to make a name for themselves in this field if they are provided with financial backup and training facilities. That is why the college has tried to provide all sorts of help in this regard.

॥ विद्यया विन्दतेऽमृतम् ॥

4. The Practice

The "Udbhaboni" Exhibition will give an opportunity to the students to showcase their talents in handicrafts. They will get an opportunity to earn by using these talents and can even finance their studies through innovative handmade products. Students in higher education will get the opportunity to learn a skill alongside their regular studies. In a country with a high density of population it is necessary to hone a skill for employment purposes and the college authority wants to encourage this practice which is also mentioned in the NEP. This is our uniqueness of this practice.

5. Evidence of Success

Katwa College IQAC, Cultural Cell and National Service Scheme jointly organised a handicrafts exhibition and fair in the Katwa College premises for this purpose on 20 and 21 June 2024. There were arrangements for displaying and selling food items, handmade items and textiles made by current and former students of the college with a total of 23 stalls.

The items sold at these stalls were of good quality and comparatively less price and this initiative by the college was successful. The students got new opportunities in front of them. There were also cultural programmes by artistes from the college. Many decorative items and ornaments of clay, wood etc were very popular attractions. Various food items especially sweets, cakes and *pithe* were also a big attraction.

This exhibition gave an opportunity to local artisans to sell their products and reach a larger consumer base and give a fillip to their business. The 23 stalls together sold good worth about Rs. 40,000 in the two days.

6. Problems encountered and resources required:

Most of the students of Katwa College belong to the surrounding rural areas and financially weak families. Though many of them particularly the girls are talented in the field of handicrafts they require training. However due to distance and transportation problems many of them are not in a position to attend training classes at the end of the regular college classes even if the authorities provide for such training. They cannot overcome family financial problems even if the college authorities make arrangements for providing financial backup. They are also faced with the problem of marketing of the handicraft items made by them. Though they make many kinds of products not all products have a

॥ विद्यया विन्दतेऽमृतम् ॥

market demand. Thus the college can try and overcome these problems by arranging for an online and also an offline sales outlet.

7. Any other information:

On 20-21 June 2024 the college organised 'Udbhaboni', an exhibition and fair of handicraft items in the college campus jointly organised by Katwa College IQAC, Cultural Cell and National Service Scheme. Through this the college has tried to give wings to our students to fulfil their dreams. In this fair, the volunteers of the NSS have sold eco-friendly pens, containing seeds of various trees, so that when the pen is thrown away after use the seeds may germinate and sprout. Eco-friendly jute items were also sold. All the items were made without using plastic. The college has tried to provide all sorts of help by means of the exhibition and financial help etc. Also, from all the items sold at the Fair, those judged First, Second and Third by the judges were specially awarded prizes. The college is also planning to offer Add-on courses regarding Handicrafts and for the purpose of providing employment opportunities the students may be connected with governmental and non-governmental traders associations and chambers of commerce. The participant students at each stall were awarded certificates and medals in order to encourage them further.

Best Practice – 2/ (23-24)

"Ora Mathe Mathe Bij Bone, Paka Dhan Kate" –

Community awareness through Kisan Mitra Cell.

Objectives of the Practice

Katwa College Kisan Mitra Cell is to promote sustainable livelihoods for medium, small and marginal farmers by improving the knowledge of intensive farming and the following objectives are determined:

- To know about soil chemical properties by testing and choosing the appropriate crops to be cultivated.
- To train farmers about the reclamation process of soil Acidity and Alkalinity through crop rotation and Sustainable farming.
- To recommend to the farmers about the permissible amount and type of fertilizer required in their cultivated land for different crops.
- To train farmers about the use of modern technology and apps to measure crop health, weather forecast and various crop insurance schemes that improve farm performance.

The Context of the Practice

The agricultural sector in India is a vital component of the country's economy and livelihoods, but it faces a mix of challenges and opportunities. Agriculture contributes around 17-18% to India's GDP and employs nearly 10% of the workforce, India is a major producer of various crops, including rice, wheat, pulses, fruits, and vegetables playing a crucial role in ensuring food security for its large population.

॥ विद्यया विन्दतेऽमृतम् ॥

The Kisan Mitra Cell, also known as Farmers' Friend Cell is an initiative typically established by government agencies or non-governmental organizations to support farmers by providing them with essential information, assistance, and resources. The main goal of these cells is to improve the livelihoods and productivity of farmers by addressing their various needs and challenges.

Our Katwa College is located beside the lower basin of Bhagirathi, surrounded by lots of villages. Most of the pupils are coming from surrounding as well as remotely rural areas with a farming background. So a common interest about agriculture has been noticed among the students. In this connotation some form of community engagement centered on the farmers' interests or support program addressing the concerns of the farmers would have been a great contribution on behalf of our respected Principal Dr. Nirmalenda Sarkar and the Head of the Geography department of Katwa College, Smt. Madhumita Sen.

Among the numerous controlling factors, agricultural productivity is highly affected by the physical and chemical composition of the farmland soil. That's why frequent soil testing is necessary to good crop and soil health. This could be conducted in the Geography department's laboratory where we possess soil testing kits. The college has resolved to support farmers in the surrounding regions by providing free soil testing facilities for their agricultural lands. To implement this initiative continuously, the Kisan Mitra Cell at Katwa College was created on 08.01.2019. Side by side a special committee has been formed to fruitfully achieve the aforementioned goals by the guidance of IQAC Coordinator, Katwa College Utpal Das.

The Practice

As per meeting resolution we visited the selected villages and collected soil at 2 feet depth by sample collection instrument. Our students actively collected the soil samples from the plot with the help of Cadastral Map and GPS location. Then processed the sample to test, determine the NPK status, pH level, Organic Carbon and made a report card for selected plots. We also cross checked the present condition of lands through the BanglarBhumi website. As the

॥ विद्यया विन्दतेऽमृतम् ॥

characteristics of soil in a specific area are not constant, continuous monitoring is necessary. We gathered and analyzed soil samples biannually. Due to the COVID-19 pandemic, sample collection was halted after September 2020 and restarted in June 2022. In the chart below the soil sample collection programmes are summarised-

Soil Sample Collection Date	Study area with JL Number	Number of selected samples	Number of students Participated
28/01/2019	Khajurdihi (Sheet-1), JL No-28	20	20
26/07/2019	Khajurdihi (Sheet-2), JL No-28	20	29
14/02/2020	Tikarkhanji, JL No-82	20	20
20/06/2022	Ekaihat, JL No-28	25	24
03/08/2023	Panchghara, JL No-28	15	20
02/07/2024	Sudpur (Sheet No-1), JL No-30	20	20

After preparing the soil report card, our community based outreach programme has been started. We met and engaged with the farmers personally. Once they understood our goals, they were assured that our purpose was to assist them. From there our team handled the entire process from interacting with people to providing field improvement recommendations (such as fertilizer adjustments or lime applications to reduce acidity) to boost yields. While adjusting nutrient levels, we considered the next season's crops, as each plant type requires specific nutrient balances for healthy growth. We also factored in soil type, since nitrogen needs vary by soil and are highest for clay fields. Maintaining the proper pH is crucial

॥ विद्यया विन्दतेऽमृतम् ॥

for crop productivity, as both high and low pH can harm plant growth. Acidic or alkaline fields were recommended for appropriate treatment, like raising pH with lime. After analyzing nutrient content, we guided farmers to adjust concentrations to optimal levels, recommending specific fertilizers and quantities. Knowing nutrient levels allows precise fertilizer use, avoiding unnecessary chemicals that can harm users, consumers, and the environment. Below mentioned the dates of community outreach programme and some suggestions

Date of Outreach Programme	Village	Responded Villagers

Effects of Acidity on Plant	Reclamation of Acidity	Reclamation of Alkalinity
Toxic effects on plant root tissue, less branching and short in length	Addition of liming Materials, "Use of basic fertilizer such as Sodium Nitrate, Basic Slag etc., Planted highly acid loving plants such as Potato, Paddy, Sweet Potato etc.	Adequate Drainage

Nutrients and their role in Plant Health

Nutrients	Deficiency Symptoms to Plants	Control of Deficiency
Nitrogen(N)	*Stunted plant growth, "Shedding of leaves and fruits. *Lower leaves turn yellow.	*Use of Nitrogen fertilizer and spray of Urea
Phosphorus(P)	*Leaves become smaller, Stems and leaves are purple colour, "Stunted growth and delay maturity.	*Application of Phosphatic fertilizer such as Superphosphate
Potassium (K)	*Margins of leaves turn brown and dry. *Stunted growth.	*Use Potassic fertilizer in soil eg. Muriate of Potash

Evidence of Success

The entire event was successful in meeting out goals. The villagers' behavior was courteous, and their enthusiasm was remarkable. They invited our students for similar programs in the future as it brought a fresh perspective to their routine

lives, and the students' enthusiasm was evident. It was a distinctive experience for the students to perform outside classroom laboratories and apply their theoretical knowledge to practical life. Farmers are more interested in the use of Plantix apps, where they get the chance to measure plant health as well as determine the plant health issues and related solutions.

Problems Encountered and Resources Required

To continue this biannual Kisan Mitra Cell programme all our members with beloved students try their level best performance. The following problems are a major concern-

Infrastructural Problem-

- Due to our limited number of Soil Kit Boxes finding the results took a lot of time.
- .Due to lack of universal indicators and colour charts we are not able to complete the result through Centrifuge Machine, only using a simple Kit that is time consuming.
- We also faced a problem when a single sample shows variable results.

Environmental Problem-

Heavy rainfall in monsoon delayed the total procedure from sample collection to test. Wet soil samples are not appropriate for testing that's why more time is necessary to dry the soil and complete the task. On the other hand, in very high temperatures in summer, soil organic carbon may be lost and actual measurements are not possible.

Although some infrastructural burden and bad weather phenomena created problems but due to the kind cooperation of college authorities and cordial behaviour of villagers, we could easily overcome this situation.
